THE DOCTRINAL CONTROVERSY.

On comparing the doctrines promulgated by Jos. John Gurney with those held by Elias Hicks, it is obvious that they are totally irreconcilable with each other; and on a close examination it will be found, that neither of those eminent men held views, in all points, strictly in accordance with the writings of the early Friends. This is manifest from their own declarations. "Were I required," says J. J. Gurney, "to define Quakerism, I should not describe it as the system so elaborately wrought out by a Barclay, or as the doctrines, and maxims of a Penn, or as the deep and refined views of Pennington, for all these authors have their defects as well as their excellencies. I should call it the religion of the New Testament of our Lord and Saviour Jesus Christ, without diminution, without addition, and without compromise."

Elias Hicks writes, in relation to the atonement: "Our primitive Friends stopped short in that matter, not for want of faithfullness, but because the day, that was in some respects still dark, would not admit of further openings, because the people could not bear it, therefore it was to be a future work."

It will therefore be admitted by the impartial inquirer, that the doctrines of Elias Hicks are much nearer to the standard of early Quakerism than those of Joseph John Gurney, and there is reason to conclude that each of them honestly believed his views to be, in all essential points, nearly the same as those of Fox, Penn, and Barclay.

In this examination, it must be borne in mind that no Yearly Meeting or other organized body of Friends in England or America has ever given its official sanction to all the doctrinal views of either Gurney or Hicks. All Friends concur in referring to the New Testament as the repository of their doctrines, to the Holy Spirit as their expounder, and to the writings of the early Friends as corroborative evidence.

As both Joseph John Gurney and Elias Hicks manifested in life and conversation a Christian spirit, we cannot doubt the reality of their devotion, or the sincerity of their professions. The discordance between their doctrinal views was doubtless the result of education and

Orders by mail promptly attended to at
PHILLIPS' Gallery.

position, increased, perhaps, by a difference in the natural tendencies of their minds.

It has often been asked, how can we reconcile such a diversity of doctrines among those who profess to be led by the Spirit of Truth in their ministrations? This has, doubtless, been a stumbling-block to many sincere, seeking souls. It can only be removed by bearing in mind the frailty of human nature, and the condescension of Infinite Goodness. The Spirit of Truth is infallible in itself; but man being fallible, is liable to mistake its dictates: unless preserved in watchfulness and humility.

It is the experience of all truly religious persons that, in their season of private devotion, subjects of deep interest to their spiritual welfare are sometimes opened to their view, and instruction is imparted to them in the language of impressions made upon the mind. By this means they are enlightened in regard to the duties of life, and sometimes doctrinal subjects are opened to the understanding; but it does not appear that every doctrine of Christianity is always revealed in clearness, even to the most devoted minds. Now we must remember that ministers of the gospel are, in regard to their religious experience, taught in the same manner as others, by the illumination of divine grace, and on some subjects the light may not have shone, leaving them still under the influence of traditional opinions. Even the Apostle Paul acknowledged, "We know in part and we prophesy in part." * * * * "For now we see through a glass darkly." They who are called to the gospel ministry are, at times, moved by an indescribable impulse, accompanied with love to God and man, to communicate to others the truths that have warmed their own hearts. This preparation for religious service is thus described by the Psalmist: "My heart was hot within me, while I was musing, the fire burned: then I spake with my tongue.

When the Holy Spirit illuminates the understanding, all its faculties are quickened and invigorated. It is then that the chambers of memory are unlocked, and he who is instructed unto the kingdom of heaven, "brings forth out of his treasures things new and old;" passages of Scripture adapted to the occasion are brought to mind, and sometimes seen in a new light.

NOTES TO THE READER.

I. The astronomical calculations in this work, are made to true clock time, the same as in the United States Almanac, the North American Almanac, and other standard works. The effects of refraction, according to the latest improved Tables of Bessel, and the equation of time, have both been applied to the time of the Sun's rising and setting: so that the Sun, the Almanac, and a good clock, will agree the year round.

II. A Time-piece may be set very nearly true by the rising, setting, or southing of the Sun, Moon or Stars,—but more accurately by the Sun, (or southing of the Sun, or a fixed Star) anywhere on or near the 40th degree of north latitude.

III. The time of the rising, setting, or southing of a fixed Star, may be carried several days forward by subtracting, or backward by adding 4 minutes per day.

IV. The common day of 24 hours, begins at midnight, and morning (marked morn.) continues from midnight till noon; and afternoon (marked aft.) continues from noon till midnight; this should be remembered carefully when looking for the times of the rising, setting, or southing of the Moon or Stars soon after midnight.

V. Under Moon Phases; Last Quarter on the 16th of First month marked morn, will be in the aft. at New York and Philadelphia: Last Quarter on the 14th of Fifth month marked morn, will be in the aft. at New York, Phila. and Baltimore; and New Moon on the 17th of Eighth month marked aft. will occur on the morning of the 18th at New York, Phila. and Baltimore all at the times respectively stated under those headings.

☞ We invite the special attention of Friends to the various business cards in this year's Almanac. The houses advertised are those of the most reliable character, with whom they may feel assured of being honorably dealt with, in the purchase of goods and transaction of business.

We have allowed only those of the best standing to use the work as an advertising medium.

TRUE CLOCK TIME.

The expression "the Sun, the Almanac and a good clock, will agree the year round" simply means that the calculations of the almanac have been reduced to true clock time. By refering to the Calendar, we find on 1st. month sunrises 7h. 24m., sun-sets 4h. 44m., sun south 12h. 3m. 43s.; and if you have a fair view, you will find that the sun will be in the horizon at 24 min. past 7 o'clock in the morning, and 44 min. past 4 in the evening; and if you are in a position to observe its meridian passage accurately, you will find the sun's centre to be on the meridian at 3 min. and 43 sec. past 12 o'clock, noon on that day; the same will be true for every other day throughout the year, thus the sun, the almanac, and a good clock, will agree the year round.

That was the idea intended to be expressed, and that is the way people generally understand it.

It is true however that clocks and watches cannot be made to measure time in accordance with the motions of the real sun, I say real sun, because Astronomers have a sun they call the "*mean* sun," and clocks and watches are made to measure time in accordance with the motions of this *mean* Sun. A *day* is the period we divide into hours, minutes, and seconds, therefore in order to understand the divisions of time, we must first know what a *day* is?

A *day* is the interval of time between the departure of any meridian from a heavenly body and its succeeding return to it, and derives its name from the body with which the motion of the meridian is compared. The interval between the departure and return of a meridian to the Sun is called a *solar* day; in the case of the Moon the interval is called a *lunar* day; and in that of a Star, a *sidereal* day. The revolution of the Earth on its axis is always performed in the same time; and if the heavenly bodies preserved the same position with respect to each other, the intervals between the departure and return of a meridian to each would be the same, and all days, consequently, of equal length.

JOHN DAVIS. M. DAWSON RICHARDS.

Pictures taken equally well in cloudy as in clear weather. PHILLIPS' Chestnut and Ninth Street.

The Sun, (or, more strictly, the earth in its orbit,) the Moon, and the Planets are, however, in continual motion; and with velocities not only different from each other, but varying in each particular body: the length of a day, as determined by any of these bodies, is therefore a variable quantity.

Astronomers, with a view of obtaining a convenient and uniform measure of time, have recourse to a *mean solar day*, the length of which is equal to the mean or average of all the apparent solar days in a year. An imaginary Sun, called the *mean* Sun, is conceived to move uniformly in the Equator with the real Sun's *mean* motion in Right Ascension, and the interval between the departure of any meridian from the *mean* Sun and its succeeding return to it is the duration of the mean solar day. Clocks and chronometers are adjusted to mean solar time; so that a complete revolution (through 24 hours) of the hour hand of one of these machines should be performed in exactly the same interval as the revolution of the Earth on its axis with respect to the mean Sun. If the mean Sun could be observed on the meridian at the instant that the clock or chronometer indicated $0^h\ 0^m\ 0^s$, it would again be observed there when the hour hand returned to the same position. As the time deduced from observation of the *true* Sun is called *true* or *apparent* time, so the time deduced from the *mean* Sun, or indicated by the machines which represent its motion, is denominated *mean* time, or in this almanac *true clock* time.

ECLIPSES.

In the year 1868 there will be two Eclipses of the Sun, and a Transit of Mercury over the Sun's disc.

I. There will be an Annular Eclipse of the Sun, on 23rd of Second Month, invisible here, visible in Africa, South America and the Atlantic Ocean.

II. There will be a Total Eclipse of the Sun, on the 17th of Eighth Month, invisible on this Continent, visible in Africa, Asia and the Pacific Ocean.

III. There will be a Transit, of Mercury over the Sun's disc, on the 5th of Eleventh Month, visible in Africa and the Indian Ocean.

VENUS.

Venus will be Evening Star until the 16th of Seventh Month; then Morning Star the remainder of the year. It will be brightest on the 9th of Sixth Month, visible in the West; and on the 21st of Eighth Month, visible in the East, in the morning.

MERCURY.

Mercury will be brightest about the 7th of Fourth Month, 6th of Eighth Month, and 24th of Eleventh Month, at which times it will likely be visible, being then in the East just before sunrise. It will again be brightest about the 17th of Second Month, 13th of Sixth Month, and 9th of Tenth Month, when it will be in the West immediately after Sunset.

STOKES & WOOD, 702 Arch Street.
NEAT FRENCH LAWNS.

DO WHAT YOU CAN.

Don't think there is nothing for children to do,
  Because they can't work like a man;
The harvest is great, and the laborers few,
  Then children do all that you can.

You think if great riches you had at command,
  Your zeal should no weariness know,
You'd scatter your wealth with a liberal hand,
  And succor the children of woe.

But what if you've naught but a penny to give?
  Then give it, though scanty your store;
For those who give nothing when little they have,
  Then wealth will do little more.

It was not the off'ring of pomp and of power,
  It was not the golden bequest—
Ah no, 'twas the mite from the hand of the poor
  That Jesus applauded and blessed.

Then don't be a sluggard and live at your ease,
  And life with vain pleasures beguile;
But ever be busy and active as bees,
  And God on your labors will smile.

Depot, No. 720 Chestnut St.

Obvious reasons why Wilcox & Gibbs' Family Sewing Machines are becoming so *universally popular*—:

First. They are the *"Perfection of Mechanism,"* and are so regarded by eminent engineers, machinists and scientific men everywhere, because of their *superior finish* and *elegance of construction.*

☞ *Each machine is as carefully and accurately finished as a watch.* ☜

LUNAR INFLUENCE.

From the earliest periods, mankind have been disposed to trace the causes of the wonderful and varied phenomena of nature that are daily occurring around them. In doing this, it is not to be wondered at that great errors have frequently been adopted and promulgated, even by some who claimed to be philosophers and learned men, and to the present day many of the popular errors, prejudices and superstitions of early time are handed down and impressed

No. 720 Chestnut St,

Willcox & Gibbs' Family Sewing Machines have rapidly taken *foremost place* among the well known machines of the day.

Secondly. Because they are adapted in the *greatest range of work*, and will use successfully either cotton, silk or linen thread.

☞ *These machines are fully competent, where others are found wanting.* ☜

upon the minds of the young, which are regarded by them through life as profound truths.

In attempting to trace these causes not a few are attributed to the influence of comets—but more to the moon. It is of one of these popular delusions entertained by many of a certain class in whose prosperity and welfare we feel a special interest, that we design now particularly to speak. It is of the influence that the moon is supposed to have upon vegetation and upon the various operations connected with farming.

☞Office, No. 720 Chestnut St.

Willcox & Gibbs' Family Sewing Machines are *highly recommended by all who use them.*

Thirdly. Because they make the patent "*twisted-loop-stitch,*" which is the most beautiful, elastic and durable stitch known.

☞ *This stitch overcomes all objections to a single-thread machine.* ☜

Many have been taught to believe that the phases of the moon must be consulted before performing many of the most common labors of the farm. If the "worm" of a common rail fence is to be laid, the moon is the index of the proper time; if the seeds of onions, beets carrots, turnips, potatoes, &c., are to pe planted, a particular age or phase of the moon must be observed; if the seeds of another class of farm crops, which are produced above ground, are to be planted, and though the ground is in the best possible order and the weather most propitious, the planting must be

Depot No. 720 Chestnut St.

Willcox & Gibbs' celebrated Sewing Machines are regarded *very superior for family use.*

Fourthly. Because they are "*gloriously simple*," as readily comprehended as a pair of scissors, and not more liable to derangement.

*** *These machines are kept in order, free of charge.*

deferred until the moon presents an opposite phase, and these important operations are put off ten or fifteen days, and this delay, in our ever-changing climate, perhaps causes the crop to be overtaken by either drouth, flood or frost, and results in a loss of one-half of what otherwise might have been produced. If the beef or pork for family use is to be killed, upon no consideration is it to be done except on the increase of the moon," else it will "shrink in the pot," and even if the good house-wife has to engage in that important chemical operation of

Willcox & Gibbs' Sewing Machines *are acknowledged the best for manufacturing purposes.*

Fifthly. Because they can be run at the *highest speed*, and are the *most durable in constant use.* *Three thousand perfect stitches* can be made in a single minute by power.

*** *Willcox & Gibbs' Machines never drop stitches.*

soap-making, the materials will not mingle so as to insure "luck," unless the moon is right; and so of other important operations which it is needless to enumerate.

But this wonderful influence of the moon upon the every-day operations of man in his terrestrial sphere was entirely overlooked by the most profound philosophers and astronomers of the world. Neither Copernicus, Kepler, Galileo, Newton, La Place, nor Herschell, ever thought of questioning the moon as to when potatoes should be planted, wheat sown, or the

Depot No. 720 Chestnut St.

Willcox & Gibbs' invaluable Sewing Machines *are cheerfully recommended by all physicians.*

Sixthly. Because they are *entirely noiseless*, and are operated with *perfect ease.* "They can safely be used in a *sick room*, or by the cradle of a *sleeping infant.*"

*** *The work is fed from the operator along the line of sight.*

---

pigs killed; and if they ever gave advice to farmers on these subjects, it was no doubt like the rules and wise sayings of "Poor Richard," laid down in the almanacs by Dr. Franklin.

The moon is one of the largest of that class of bodies called secondary planets or satellites, and is the nearest to the earth of all the celestial bodies. Its most sensible influence upon our globe, is causing the tides of the ocean, by that universal law of attraction, and its influence in this respect is greater than that of any other celestial

Willcox & Gibbs' improved Sewing Machines are rapidly becoming the *general favorite*.

Seventhly. Because they are *absolutely complete*, and will hem, fell, braid, bind, cord, tuck, gather and embroider, all in the *most perfect* and *satisfactory manner*.

*** *The hems, fells, &c., are turned under, rather than over, thus bringing the stitching on the right side.*

---

body, because it is the nearest.

The moon's medium distance from the earth is about 237,000 miles, and it makes about thirteen revolutions around the earth while the earth makes one annual circuit around the sun. The moon travels in orbit around the earth at the rate of 2,200 miles an hour; but when we add the distance that it travels with the earth in its orbit—the moon's real velocity through space is about 70,000 miles an hour. The moon is about 2,180 miles in diameter

Willcox & Gibbs' rapid, noiseless Sewing Machines are destined to gain a *pre-eminence.*

Eighthly. Because they are *easily managed;* a *novice* requires *no instruction* and *but little practice* to become as skilful as an experienced operator.

*** *No screw-driver or other tools are used in oiling or cleaning machines.*

---

a little more than one fourth part the diameter of our globe, and consequently, in point of solidity, it is only the forty-ninth part of the bulk of the earth.

The moon affords no light of its own; all the light we see is that which is cast upon the moon's surface from the sun, just as any body on the earth receives and reflects light when turned towards the sun. The surface of the moon is no more enlightened at one time than another; it is always the same.

Depot, No. 720 Chestnut St.

Willcox & Gibbs' most excellent Sewing Machines are *gaining popularity* every day.

Ninthly. Because *they cannot be turned the wrong way*, and may be *started with the foot*, while both hands are otherwise employed in holding or arranging the work.

*** *This patent (noiseless) "brake" or "stop" is of incalculable value to beginners.*

The side that is towards the sun is always light, and the opposite side always dark, because the rays of the sun can only fall on one side at the same time. As we have said, the moon moves thirteen times around the earth in the space of one year. In making each of these revolutions, the moon passes between the earth and the sun, and is then called new moon, because the moon and the sun are in nearly the same direction from the earth, and hence but a small portion of the enlightened side of the moon is

ELLIPTIC LOCK STITCH

SEWING MACHINE.

THE IMPROVED ELLIPTIC SEWING MACHINE, (formerly known as the Sloat Elliptic,) having by the force of its great inherent merits completely triumphed over difficulties that for years encompassed it, is now firmly established upon a permanent basis, being manufactured by one of the best companies in the United States, the Wheeler & Wilson Manufacturing Co., which has recently invested over a hundred thousand dollars in improved machinery for its manufacture: every machine being made in the most thorough manner by the best machinery in the world.

In addition to performing, with much less machinery, every variety of work done on any other machine, by a simple device (peculiar to this machine) it executes most beautiful embroidery. Moreover, its motions all being positive, and the application of power more direct, it is operated much more easily and noislessly than other machines, this being a most important consideration, especially for the ladies. While incomparably the most simple in construction, this machine is by far the most complete in the variety and perfection of its attachments, (giving it an unequaled range of application to purposes and material,) among which may be mentioned:

The Glass Cloth Presser, a beautiful invention, (far superior to the old metal foot,) enabling the operator to see every stitch as taken. *The Improved Hemmer*, the most simple and convenient of adjustment, (being firmly attached by simply sliding it into a groove in the foot,) and the most perfect in operation, turning a hem of any width with uniform perfection. *The Glass Braider and Trimmer*, an entirely new (and the only) device for self-guiding braid or trimming of any kind or size. *The Quilting Guage* for quilting with perfection articles of any size or material without marking or creasing the lines to be sewed. *The Corder*, a most perfect little piece of mechanism, (and the only one in approved use by shirt-makers,) enabling the operator to sew in the cord without basting or any prepartion. *The Binder*, (self-adjusting,) which turns binding of any width on curved or straight lines. *The Marker and Tucker*, invaluable for tucking purposes, &c.

Believing that a thorough investigation (which we particularly desire) cannot fail to satisfy every one of the entire truthfulness of our assertions, and of the pre-eminent superiority of our machine we cordially invite all who may wish to see a perfect family Sewing Machine, (whether desiring to purchase or not) to call at our establishment in this city, or at any of our agencies throughout the country, and examine it for themselves. Agents wanted in every town and county in the State. Send for a circular to

KEEN & WALMSLEY,

General Agents for Pennsylvania, Delaware and West Jersey

Willcox & Gibbs' noiseless Family Sewing Machines *gain friends continually, but never lose them.*

Tenthly. Because they are *self-regulating*, and *always in working order.* They never have "moods," and never vex or ruffle the temper, even of the most irritable.

*** *The hemmers, fellers, braiders, needles, &c., are all self-adjusting.*

---

turned towards us, but as it moves in its orbit around the earth, more and more of the enlightened side of the moon is turned towards the earth, until about the end of two weeks from the time of passing the sun, or the time of new moon, it comes into that part of its orbit opposite the sun—that is, the earth occupying a position between the sun and the moon, and consequently the whole enlightened side of the moon is towards the earth, in full view, and is then called full moon.

Willcox & Gibbs' rapid noiseless, easily-managed, du rable, first-class Sewing Ma chines *are in excellent favo everywhere.*

Eleventhly. Because the *prove superior* to the most san guine expectations.

*** *The most exalted repre sentation is never exaggerated*

Now, when it is considered that the moon shines from no light of its own, but only from light borrowed and reflected from the sun, and the varied appearance which it presents to us at different times in its circuit around the earth is caused solely, as we have said, by the different positions which the moon occupies in relation to the sun and the observer on the earth, how can it be possible that it can have any influence upon the growth of plants or any of the operations of the farmer. Another important influence has long been attributed to the moon, and that is upon the weather, at the period of each quarter.

Depot, No. 720 Chestnut St.,

Agents for the sale of Willcox & Gibbs' celebrated single-thread Sewing Machines *are eminently successful.*

Twelfthly. Because every machine sold serves as a *"telling advertisement."*

☞ *No dissatisfaction is ever expressed, but hearty recommendations.* ☜

CHARACTER.—Did you ever watch a sculptor slowly fashioning a human countenance? It is not moulded at once. It is laboriously wrought. It is a work of time; but at last the full likeness comes out, and stands forth in the solid marble. So does a man carve out his own moral likeness. Acts of thought and will, and efforts, shape the features and expressions of the soul. Habits of love, piety, and truth, of falsehood, passion, of goodness, silently mould it, till at length it wears the likeness of God, or the image of a demon.

ALLEN & NEEDLES,

SOLE PROPRIETORS AND MANUFACTURE
OF THEIR IMPROVED

Super-Phosphate of Lim

We were the originators of the preparation of this well-known Manur Philadelphia, our house having been engaged for over 19 years in the ma facture and sale of CONCENTRATED FERTILIZERS.

During the long time our name has been honorably associated with v are termed "concentrated manures," a great many manufacturers have spr into existence, and have distributed their various articles through the coun Farmers, being disappointed after a series of years, now *turn back* to the established article made by ALLEN & NEEDLES, with the assurance tha make but *one kind of Phosphate,* and all that leaves our works is *guarant*

It has no offensive odor, and can be stored beside any other goods with detriment to them, or inconvenience to those handling the same.

It can be had from most of the respectable dealers throughout the coun to whom we refer you.

If the merchants in your neighborhood should not have it on hand, t can procure it for you.

It is packed in new bags, uniform weight, 200 lbs. each.

Pamphlets and Price Lists sent on application.

Delivered free of Porterage to cars or boats in this city in lots of not less one ton.

The Friends' Company.

THE PROVIDENT LIFE & TRUST COMPA OF PHILADELPHIA.

This Company was organized by Friends to encourage a participa the benefits of Life Insurance among members of the Society.

PRESIDENT. SAMUEL R. SHIPLEY.

VICE-PRESIDENT. WM. C. LONGSTRETH

ROWLAND PARRY, ACTUARY.

DIRECTORS.

SAMUEL R. SHIPLEY,	Philada.	RICHARD CADBURY,	Phi
JOSHUA H. MORRIS,	"	HENRY HAINES,	
RICHARD WOOD,	"	T. WISTAR BROWN,	
W. HACKER,	"	WM. C. LONGSTRETH,	

CHARLES F. COFFIN, Richmond, Ind.

THOMAS WISTAR, M.D., MEDICAL EXAMINER.

The duty of insuring life is much more imperative than the dut suring property against fire. The object is not to prevent death, but the families of those who die without leaving an adequate support f *pendence* or *destitution*. It involves no impiety. A wise and endeavor to render such events as are beyond our control less calam their consequences than they otherwise would be, is a religious dut facilities of a Company for investing money are so great, that the co surance is comparatively nothing. It is in fact a good investment, parties live to old age. Those most distinguished for sagacity, a availing themselves of its benefits.

Reasons for Friends preferring this Compa

It is STRICTLY MUTUAL. The actual cost only is charged, and al returned in dividends. Strict economy is practised, and the interests o holders are every way guarded.

It is managed by Friends.

Friends are noted for their longevity. A large proportion of the in this Company being Friends, the advantage is obvious.

Its rates are low, and its terms accommodating. GOOD risks of nomination solicited.

Application can be made to the Office of the Company, or to an Agents.

Office, No. 111 *South Fourth Street.*

GOLD'S PATENT IMPROVED

Steam & Water Heating Apparatus

FOR WARMING AND VENTILATING

Public Buildings, Factories & Private Residences,

WITH PURE EXTERNAL AIR.

This apparatus has been brought to such a state of perfection that we can confidently recommend it to all who desire to have the PURE out-of-door AIR brought into their apartments (whether in dwelling-houses or public buildings), sufficiently warmed for the coldest weather, without being injured by contact with intensely heated surface. We use no pipes nor coils requiring steam at high pressure, but by a combination of the two modes of heating (hot water and steam) secure the best qualities of each, viz.: the *uniformity* and *endurance* of the *hot-water surface* with the *expansive* power of STEAM, able to multiply itself to *any extreme* of temperature. All this with an apparatus easily managed, which cannot explode, economical in fuel, and so constructed as not to require repairs in many years.

The entire Apparatus is located in the basement or cellar, where fresh, pure air from outside is warmed, and thence conveyed into the different departments. The Steam Generator or Boiler is made of Cast Iron, in separate sections, each a complete Boiler in itself, so that by using a greater or lesser number of these sections, the capacity of the Boiler will be increased or diminished, to adapt it to the size of the building to be warmed. From the Boiler the steam is conveyed to our Patent Radiators, or Warming Surface, which are also made of Cast Iron, and are of peculiar construction. The peculiarity consisting in increasing the external surface to about three times the extent of the inner, the effect being to reduce the heat, and thus impart to the atmosphere a soft and genial warmth, without destroying the moisture, or otherwise injuring it. Thus fully complying with all the requirements of a perfect system of ARTIFICIAL WARMING, and at the same time furnishing the requisite amount of heat to accomplish the desired end.

The construction of this apparatus, and its action on the atmosphere, produce a circulation which renders the ventilation complete, and the warming thorough.

☞ Houses already warmed by Hot Air Furnaces can easily be adapted to the use of our Steam Apparatus.

JAMES P. WOOD,
JOSEPH WOOD.

JAMES P. WOOD & CO.,

Conclusion of Lunar Article of Page 16.

☞ In order that our young readers may fully understand the subject of the Lunar article commencing on page 16, we give the illustration below, which will picture forth what we have endeavored to explain in the clearest possible terms.

S, represents the sun; E the earth, and A B C D F G H I, the moon in different parts of its circuit round the earth, with its hemisphere turned towards the sun fully enlightened. When the moon is at A, its enlightened side being turned towards the sun, its dark side is turned towards the earth, and is invisible to us except at the time of an eclipse, when the moon passes in whole or a part between us and the sun, and this only occurs at the time of new moon. When, after a few days, the moon has moved from A to B, a portion of its enlightened surface is then turned towards the earth, and it appears as a crescent; when it has arrived at C, the one-half of its enlightened side is turned towards the earth, and it appears in the form of a half moon; and when arrived at D, it presents a gibbous phase, and when arrived at F, it shines in all its splendor as a full moon. After this period it gradually declines, first to a gibbeous phase as at G, next to a half moon as at H, then to a crescent as at I, after which it arrives at its former position as at A, the period of new moon, when it is again invisible.

DOCTOR HOOFLAND'S

GERMAN BITTERS

PREPARED BY

DR. C. M. JACKSON, PHILAD'A, PA.

Is not an Intoxicating Beverage, but a highly concentrated Vegetable Extract, a pu
Tonic, free from Alcoholic, Stimulant or injurious Drugs, and will effectually cure
Liver Complaint, Dyspepsia, and Jaundice. HOOFLAND'S GERMAN BIT-
TERS will cure every case of Chronic or Nervous Debility, Disease of the
Kidneys, and Diseases arising from a Disordered Stomach.

**Observe the following Symptoms resulting from Disorders of th
Digestive Organs:**

Constipation, Inward Piles, Fulness of Blood to the Head, Acidity of the Stomac
Nausea, Heartburn, Disgust for Food, Fulness or Weight in the Stomach, Sour Eruct
tions, Sinking or Fluttering at the Pit of the Stomach, Swimming of the Head, Hurri
and Difficult Breathing, Fluttering at the Heart, Choking or Suffocating Sensatio
when in a lying posture, Dimness of Vision, Dots or Webs before the Sight, Fever a
Dull Pain in the Head, Deficienty of Perspiration, Yellowness of the Skin and Ey
Pain in the Side, Back, Chest, Limbs, &c., Sudden Flushes of Heat, Burning in t
Flesh, Constant Imaginings of Evil, and great Depression of Spirits.

JOHN M. WHITALL, a prominent and highly respected member of the Society
Friends, writes:

"Having for a long time been acquainted with the virtues of thy Hoofland's Germ
Medicines, I fully testify to their efficacy. For several years I have never been wi
out them in my family, and it gives me pleasure to state that they have been used wi
entire success." Thy friend truly,

JOHN M. WHITALL, Race above Fourth Street, Philada.

**From the Hon. George W. Woodward, Chief Justice of the Supren
Court of Pennsylvania.**

PHILADELPHIA, March 16th, 1867.

I find "Hoofland's German Bitters" is not an intoxicating beverage, but is a go
tonic, useful in disorders of the digestive organs, and of great benefit in cases of debili
and want of nervous action in the system. Yours, truly,

GEORGE W. WOODWARD.

HENRY'S
PATENT CORDING GUIDE.

To the public we offer this Cording Guide as one of the most complete and valuable attachments to the Elliptic and Wheeler & Wilson Sewing Machines ever invented.

After a thorough trial of six months we feel competent to say that this Corder is second to no Sewing Machine Attachment except the well known Foot Hemmer and Feller. It seems to be a part of the same invention and an indispensable part of the machine, which once seen cannot be done without. It gives us a point in advance of other machines in perfection of attachments, and is an important item in our sales, not only by itself, but by its being a valuable aid to the sale of machines, as it enhances the value of each machine to the purchaser.

The mechanical construction of this Cording Guide allows it to be readily placed in the presser foot of the machine at once ready for use. It is always adjusted to feed in the cord without the aid of hands, and is not liable in any way to get out of order.

We herewith append one of the many testimonials in its favor that might be adduced :—

We are using one of the Henry's Patent Corders on our Family Sewing Machine, and consider it a very successful and valuable improvement, and one which we could not well do without. And now that we have the self-cording guide in such convenient shape, together with the other attachments, these Sewing Machines seem to possess all that is required in the way of attachments. My people are delighted with the beautiful work this Corder produces, and the ease with which it is managed.
